Donations and bequests increased our Endowment Funds by \$17,424, including securities valued at \$11,872 received from the Estate of Mrs. Elizabeth Mills Reid, and a generous donation of \$5,000 from Miss Isabelle W. Sewall in memory of her sister, Helen E. Sewall.

We established during the year an Annuity, or Pension, Fund providing annuities for certain of our employees when they shall have reached the age sixty-five, contributions to this Fund being made by both employees and the Hospital. This was done in view of the fact that employees of philanthropic institutions do not come under the Federal Social Security Act.

To the Members of the Corporation
of ST. LUKE'S HOSPITAL

It is gratifying to report that during the past two years earnings and collections have been the highest ever known in the experience of St. Luke's. Because we were fortunate enough to have been able to spend a considerable sum on construction and maintenance during previous years, it was possible during the year ended June 30, 1936 to devote our surplus earnings to additional free work and service, increased salaries in the nursing department, and special and semi-special nursing. Dr. Johnson's Report contains interesting data with respect to semi-special nursing and its attendant saving in cost to the patient, although at increased cost to the hospital.

The daily average of patients for the year ended June 30, 1936, exclusive of infants, was 5136 as against 4864 for the previous fiscal year; the daily average number of patients was 154.03, or 77% of capacity, compared with 133.9, or 66% of capacity, the previous year; and the total number of days treatment furnished was 56,223 as compared with 48,899 the previous year.

The free and part-pay work during the year amounted to \$71,276, an increase of nearly \$11,000 over the previous year. Of this free work, \$19,326 was paid for by the Community Chest, an increase of more than \$3,000 over the previous year; \$14,868 by our Endowment; \$10,495 by the Katharine and Harry Babcock Fund; and \$15,955 by the Fund dispensed by Dr. Weeks, this last being more than twice the amount expended by this Fund during the previous year. The contribution made by the Staff during the year in professional services amounted to about \$50,000.

Donations and bequests increased our Endowment Funds by \$17,994, including securities valued at \$11,572 received from the Estate of Mrs. Elizabeth Mills Reid, and a generous donation of \$5,000 from Miss Isabella M. Cowell in memory of her sister, Helen E. Cowell.

We established during the year an Annuity, or Pension, Fund providing annuities for certain of our employees when they shall have reached the age sixty-five, contributions to this Fund being made by both employee and the Hospital. This was done in view of the fact that employees of philanthropic institutions do not come under the Federal Social Security Act.

To the Members of the Corporation of St. Luke's Hospital

It is gratifying to report that during the past two years earnings and collections have been the highest ever known in the experience of St. Luke's. Because we were fortunate enough to have been able to spend a considerable sum on construction and maintenance during previous years, it was possible during the year ended June 30, 1935 to devote our surplus earnings to additional free work and service, increased salaries in the nursing department, and special and semi-special nursing. Dr. Johnson's Report contains interesting data with respect to semi-special nursing and its attendant saving in cost to the patient, although at increased cost to the hospital.

The daily average of patients for the year ended June 30, 1935, exclusive of infants, was 5185 as against 4844 for the previous fiscal year; the daily average number of patients was 134.08, or 77% of capacity, compared with 133.9, or 65% of capacity, the previous year; and the total number of days treatment furnished was 56,225 as compared with 48,892 the previous year.

The free and part-pay work during the year amounted to \$71,876, an increase of nearly \$11,000 over the previous year. Of this free work, \$19,328 was paid for by the Community Chest, an increase of more than \$3,000 over the previous year; \$14,888 by our Endowment; \$10,425 by the Katherine and Harry Babcock Fund; and \$15,925 by the fund dispensed by Dr. Weeks, this last being more than twice the amount expended by this fund during the previous year. The contribution made by the staff during the year in professional services amounted to about \$50,000.

Donations and bequests increased our Endowment Funds by \$17,994, including securities valued at \$11,572 received from the Estate of Mrs. Elizabeth Mills Reid, and a generous donation of \$5,000 from Miss Isabelle M. Cowell in memory of her sister, Helen E. Cowell.

We established during the year an Annuity, or Pension, Fund providing annuities for certain of our employees when they shall have reached the age sixty-five, contributions to this fund being made by both employees and the Hospital. This was done in view of the fact that employees of philanthropic institutions do not come under the Federal Social Security Act.

All of our X-ray apparatus has been made shock-proof. You will note that Dr. Fulmer states, in his report, "There is probably no other hospital in the country with a first-class Radiographic Department that is completely shock-proof".

The air-conditioning equipment installed in three rooms on the fourth floor is proving a boon to many patients, and St. Luke's is gratified to be able to offer this service without additional cost.

From Miss Kennedy's Report it will be noted that 117 students were enrolled, an increase of 12 over the previous year. The growing difficulty in obtaining nurses for institutional work is outlined, also the difficulties and expense which existed for a time during the adjustment to the new three-year basic course program and the State requirements in connection with nursing experience.

For more detailed information you are referred to Dr. Johnson's Report and the Reports of the heads of various departments.

We have passed through a period of low wages and cheap materials. We are now in a period of rising wages and rising costs. Our problem for the future is how best to meet the increasing cost of operation and at the same time expand our philanthropic service to the community.

BENJAMIN H. DIBBLEE, President

Yours very truly,

P. G. Cooke

Treasurer

All of our X-ray apparatus has been made shock-proof. You will note that Dr. Palmer states in his report, "There is probably no other hospital in the country with a first-class Radiographic Department that is completely shock-proof."

The air-conditioning equipment installed in three rooms on the fourth floor is proving a boon to many patients, and St. Luke's is gratified to be able to offer this service without additional cost.

From Miss Kennedy's Report it will be noted that 115 students were enrolled, an increase of 12 over the previous year. The growing difficulty in obtaining nurses for institutional work is outlined, also the difficulties and expense which existed for a time during the adjustment to the new three-year basic course program and the State requirements in connection with nursing experience.

For more detailed information you are referred to Dr. Johnson's Report and the Reports of the heads of various departments.

We have passed through a period of low wages and cheap materials. We are now in a period of rising wages and rising costs. Our problem for the future is how best to meet the increasing cost of operation and at the same time expand our philanthropic service to the community.

BENJAMIN H. GIBBLE, President

The President and Board of Directors
St. Luke's Hospital
San Francisco, California

Gentlemen:

I submit herewith my report as Treasurer of
St. Luke's Hospital for the year ended June 30, 1936. The
financial and operating statements constituting this report
are as follows:

Exhibit A--Statement of financial condition--June
30, 1936

Exhibit B--Statement of income and expense, year
ended June 30, 1936

Schedule B-1--Statement of operating income and
expense, year ended June 30, 1936

Exhibit C--Statement of cash receipts and disburse-
ments, year ended June 30, 1936

Exhibit D--Statement of changes in endowments, year
ended June 30, 1936 and the disposition
of endowment funds at June 30, 1936

Exhibit E--Statement of changes in endowment fund
income accounts, year ended June 30, 1936

Yours very truly,

P. G. Goode

Treasurer

General Endowment		201.75*		4,459.20		3,968.75
Totals	\$	1,066.59*	\$	14,904.13	\$	10,422.46
LYDIA PAIGE MONTEAGLE ENDOWMENTS:						
Lydia Paige Monteagle Hospital	\$	1,508.36	\$	7,886.66	\$	7,694.30
Lydia Paige Monteagle Room		576.70		1,166.78		1,296.39
Louis Findlay Monteagle Room		440.72		1,172.18		1,325.41
Mary Warren Paige Free Bed		145.01		606.86		548.20
Timothy Paige Free Bed		119.76		624.37		567.63
Totals	\$	2,790.55	\$	11,456.85	\$	11,431.93
TOTALS--ALL ENDOWMENTS	\$	1,724.16	\$	26,360.98	\$	21,854.32
Expenditures of endowment fund income were classified as follows:						
Hospitalization						
Income added to principal						
Income of Women's Auxiliary Bed Fund transferred to that of Bishops						
Kip and Nichols Bed Fund						96.79
Income paid to beneficiary of the House of Friendship						463.33
Reimbursed the hospital for repairs, etc. from income of Lydia Paige Monteagle						
Building Repair Fund						715.92
Total						\$21,854.39

- (1) Includes \$2,353.29 representing interest on bequest of Elizabeth Mills Reid
- (2) Includes a donation of \$500.00 from St. Luke's Nurses Alumnae Association

Note: During the period under review and effective as of June 30, 1935, income earned by the Consolidated Endowment Fund to June 30, 1935, was re-allocated to the constituent funds on a basis deemed more equitable.

(* Figures in red)

To the Board of Directors
ST. LUKE'S HOSPITAL

Gentlemen:

I have the honor to submit the Hospital Report for the year July 1, 1935 to June 30, 1936.

The depression may be said to have ended in 1935, as far as hospital earnings and occupancy are concerned. Occupancy at St. Luke's for the past two years has been uniformly above the average for private hospitals in San Francisco. Earnings and collections were the highest ever recorded.

With all major construction, repair and equipment needs supplied, our surplus earnings have been used for free work, added service without charge, and a much more liberal policy in the matter of nursing care, i.e., special and semi-special nursing for patients unable to pay, and increased salaries for supervisors and general duty nurses, particularly.

Certain patients occupy time which should be given to others on the floor; are unable to pay for special nursing and should not be expected to pay for it. Semi-special nursing means the assignment of a general duty nurse to from one to three patients who require an unusual amount of attention. Patients pay what they can afford - usually \$1.00 to \$3.00, sometimes nothing.

When this service was started in 1928, doctors, nurses, and patients did not accept it readily. In 1930, the service increased in popularity. In 1936, the expense of this type of nursing amounted to about seven times the cost in 1930. Patients paid \$4,879.37; the hospital paid nurses \$7,300.00, or \$2,420.63, plus subsistence, more than was received from patients.

Special nursing for those unable to pay has been made available at hospital expense, upon recommendation of the Resident and Nursing Supervisor. Reliable figures for the cost of this service will not be available for some time.

Eleven "Nursing Aides" are now employed to care for minor routine nursing service throughout the hospital with considerable relief to general duty nursing and expense.

ST. LUKE'S HOSPITAL
To the Board of Directors

Gentlemen:

I have the honor to submit the Hospital
Report for the year July 1, 1933 to June 30, 1934.

The depression may be said to have ended in
1933, as far as hospital earnings and occupancy are
concerned. Occupancy at St. Luke's for the past two
years has been uniformly above the average for private
hospitals in San Francisco. Earnings and collections
were the highest ever recorded.

With all our construction, repair and
equipment needs supplied, our surplus earnings have been
used for free work, added service without charge, and a
much more liberal policy in the matter of nursing care,
i.e., special and semi-special nursing for patients un-
able to pay, and increased salaries for supervisors and
general duty nurses, particularly.

Certain patients occupy time which should be
given to others on the floor; are unable to pay for
special nursing and should not be expected to pay for it.
Semi-special nursing means the assignment of a general
duty nurse to from one to three patients who require an
unusual amount of attention. Patients pay what they can
afford - usually \$1.00 to \$8.00, sometimes nothing.

When this service was started in 1928, doctors,
nurses, and patients did not accept it readily. In 1930,
the service increased in popularity. In 1933, the ex-
pense of this type of nursing amounted to about seven
times the cost in 1930. Patients paid \$4,879.37; the
hospital paid nurses \$7,300.00, or \$2,420.63, plus sub-
sistence, more than was received from patients.

Special nursing for those unable to pay has
been made available at hospital expense, upon recommenda-
tion of the Resident and Nursing Supervisor. Reliable
figures for the cost of this service will not be available
for some time.

Eleven "Nursing Aides" are now employed to care
for minor routine nursing service throughout the hospital
with considerable relief to general duty nursing and
expense.

Nursing expense as a result of added facilities has increased from .655¢ per patient day in 1929, to .851¢ in 1935-36, or 29+%.

Professional Care of Patients (i.e., nursing and other professional services) has increased in cost from \$1.96 per patient day in 1929 to \$2.35 - almost 20%.

These increased costs of service to patients have been paid (without an increase in rates) from surplus earnings, which surplus is no longer needed for equipment and re-conditioning of the plant.

Thus, adequate nursing facilities and equipment are now available for all patients and conditions. Certain doctors have told their patients that our system of nursing and our facilities for nursing will relieve patients of special nursing expense in many cases.

TRAINING SCHOOL

Training School expense will increase as a result of the added cost of instruction and administration contemplated in the new three-year training course.

Nursing education today is being paid for largely by patients and hospitals. The State and not the patient should pay for nursing education as it pays for other kinds of education. Many hospitals propose to charge tuition for nurse training. Others will give up nurse training, leaving the State to take it over. Still others are substituting nursing aides for pupils, as they feel the work will be more economically and efficiently performed by aides who will have longer training and experience in specific duties than pupils can have, changed as they are, from one branch of nursing to another. The comparative efficiency of pupils and graduates is variously rated at from one graduate to four pupils.

The average nurse is engaged in nursing about seven years - thus, one-seventh of all nurses required by the Public must be graduated each year. The trend toward public health nursing and away from the hospital and the bedside generally, is increasing rapidly. Institutional nurses, as a group, have decreased in number and efficiency with the exodus to special and office work. It has become a serious question whether hospitals are justified in charging patients for the cost of training nurses who do not nurse.

Nursing expenses as a result of added facilities has increased from .65¢ per patient day in 1929, to .83¢ in 1935-36, or 29%.

Professional Care of Patients (i.e., nursing and other professional services) has increased in cost from \$1.98 per patient day in 1929 to \$2.35 - almost 20%.

These increased costs of service to patients have been paid (without an increase in rates) from surplus earnings, which surplus is no longer needed for equipment and re-conditioning of the plant.

Thus, adequate nursing facilities and equipment are now available for all patients and conditions. Certain doctors have told their patients that our system of nursing and our facilities for nursing will relieve patients of special nursing expense in many cases.

TRAINING SCHOOL

Training School expense will increase as a result of the added cost of instruction and administrative expenses contemplated in the new three-year training course.

Nursing education today is being paid for largely by patients and hospitals. The State and not the patient should pay for nursing education as it pays for other kinds of education. Many hospitals propose to charge tuition for nurse training. Others will give up nurse training, leaving the State to take it over. Still others are substituting nursing aides for pupils, as they feel the work will be more economically and efficiently performed by aides who will have longer training and experience in specific duties than pupils can have, changed as they are, from one branch of nursing to another. The comparative efficiency of pupils and graduates is variously rated at from one graduate to four pupils.

The average nurse is engaged in nursing about seven years - thus, one-seventh of all nurses required by the Public must be graduated each year. The trend toward public health nursing and away from the hospital and the bedside generally, is increasing rapidly. Institutional nurses, as a group, have decreased in number and efficiency with the exodus to special and office work. It has become a serious question whether hospitals are justified in charging patients for the cost of training nurses who do not nurse.

Hospitals may substitute aides for nurses; aides may be trained to meet the needs of patients and hospitals without State and group dictation or red tape. Aides will not graduate into public health work and other non-nursing activities. Aides will not put patients and hospitals to expense for which there can be no return.

PROFESSIONAL STAFF

Staff contribution to professional service afforded Endowment and Community Chest patients, amounted in dollars and cents to something like \$50,000.

The work of the House Staff has been excellent, our men having come from the following Schools:

Stanford University Medical School
University of California Medical School
Rush Medical School
University of Illinois Medical School
University of Nebraska Medical School
University of Oregon Medical School
Creighton University Medical School

Accepted applicants for the year 1936-1937 are from the following Schools:

Yale University Medical School
Rush Medical School
University of Michigan Medical School
University of Nebraska Medical School
University of Alberta Medical School
Stanford University Medical School
University of California Medical School

The following professional articles were published this year:

"BIOPSY IN MALIGNANT DISEASE" by Drs. Otto H. Pflueger and W. P. Stowe - California and Western Medicine, February 1936

"THE ROSE BENGAL TEST OF LIVER FUNCTION: PHOTOMETRIC METHOD" by Drs. W.P. Stowe and G.D. Delprat - The Journal of Laboratory and Clinical Medicine, September 1935

"CIRCINATE RETINITIS" by Dr. Ambrose E. Edgerton - American Journal of Ophthalmology, June 1936

"AIR CONDITIONING AND ITS RELATION TO UPPER RESPIRATORY INFECTIONS" by Dr. Matthew N. Hosmer - Twenty-third Annual Meeting Pacific Coast Ophthalmological Society

Hospitals may substitute aides for nurses; aides may be trained to meet the needs of patients and hospitals without State and group distribution of red tape. Aides will not graduate into public health work and other non-nursing activities. Aides will not put patients and hospitals to expense for which there can be no return.

PROFESSIONAL STAFF

Staff contribution to professional service afforded Endowment and Community Chest patients, amounted in dollars and cents to something like \$80,000.

The work of the House Staff has been excellent, our men having come from the following Schools:

Stanford University Medical School
University of California Medical School
Rush Medical School
University of Illinois Medical School
University of Nebraska Medical School
University of Oregon Medical School
Creighton University Medical School

Yale University Medical School
Rush Medical School
University of Michigan Medical School
University of Nebraska Medical School
University of Alberta Medical School
Stanford University Medical School
University of California Medical School

The following professional articles were published this year:

"BIOPSY IN MALIGNANT DISEASE" by Drs. Otto H. Fritzsche and W. P. Stowe - California and Western Medicine, February 1936

"THE ROSE BENGAL TEST OF LIVER FUNCTION: PHOTOMETERIC METHOD" by Drs. W. P. Stowe and G. D. Delprat - The Journal of Laboratory and Clinical Medicine, September 1935

"CIRCINATE RETINITIS" by Dr. Andrew E. Edgerton - American Journal of Ophthalmology, June 1935

"AIR CONDITIONING AND ITS RELATION TO UPPER RESPIRATORY INFECTIONS" by Dr. Matthew N. Hoerner - Twenty-third Annual Meeting Pacific Coast Ophthalmological Society

An idea of how important our Surgical Service has become may be obtained from figures showing the increase in the number of operations performed. Last year there were 1063 operations more than were performed in 1935, and approximately 2300 more than were performed in 1923. At times this Spring, we were compelled to limit the number of men who could be given places on the operating schedule.

LABORATORY
AND X-RAY

The work of these Departments is greatly appreciated by medical men practicing here. The work of shock-proofing the X-ray Department was completed during the year, making this Department safe for patients, doctors and technicians, as well as efficient.

Several items of new equipment were furnished the Laboratory.

CLINIC

City and County Relief Associations have relieved us of a considerable amount of out-patient expense normally performed with Community Chest and Endowment funds, approximately one-third of our Clinic work having been paid for by City and County Relief.

DIETARY

Patients and doctors continue to report the excellence of our therapeutic and regular diets.

The new gas ranges have proven very economical in the use of gas and in food preparation.

Miss Helen Wood, our Chief Dietitian, upon resignation, was replaced by Miss Carolyn Woods, another graduate of Johns Hopkins School for Dietitians.

AIR CONDITIONING
AND VENTILATION

Air conditioning was installed in three of our Fourth Floor rooms. Equipment ordered for another hospital, unable to pay for it, was purchased at cost and installed very largely by our own Engineer. Splendid results in hay fever, sinus, asthma, skin diseases have been obtained. Rates for these rooms

An idea of how important our Surgical Service has become may be obtained from figures showing the increase in the number of operations performed. Last year there were 1083 operations more than were performed in 1935, and approximately 2800 more than were performed in 1937. At times this Spring, we were compelled to limit the number of men who could be given places on the operating schedule.

The work of these Departments is greatly appreciated by medical men practicing here. The work of shock-proofing the X-ray Department was completed during the year, making this Department safe for patients, doctors and technicians, as well as efficient.

LABORATORY AND X-RAY

Several items of new equipment were furnished the Laboratory.

City and County Relief Association have relieved us of a considerable amount of out-patient expense normally performed with Community Chest and Endowment funds, approximately one-third of our Clinic work having been paid for by City and County Relief.

Splendid results in hay fever, sinus, asthma, skin diseases have been obtained. Rates for these rooms

AIR CONDITIONING AND VENTILATION

were not increased, as it was felt that air conditioning for patients who require it, is a service which should be available in hospitals. Our revenue from Fourth Floor rooms has increased markedly as a result of special demand for these air conditioned rooms.

Ventilation of chart rooms, diet kitchens and the Women's and Men's Wards was installed during the year, with great benefit.

EMPLOYEES' HOSPITAL ASSOCIATION

During the past two years, this Association has furnished 441 days of hospital care to 56 of its employee members. Each patient has been given a hospital room, and in all but a few instances, the Staff has furnished professional care without pay. Hospital Endowments and Community Chest have been relieved of the usual assistance required by employees, and their Association has paid the hospital \$2639.35, which represents an actual increase in hospital revenue, instead of charges to Endowments and Community Chest.

At the end of two years, there was a deficit in the Employees' Fund of \$450.12, which will probably be made up in the next few months. Employees now pay 65¢ a month. The deficit could have been avoided by a payment of 75¢ a month. We feel the increase will not be necessary.

CALL SYSTEM

For several years our telephone board has been decidedly overworked. Inside calls, i.e., calls for doctors and House Staff, have comprised the largest part of the operator's work, and have entailed a great deal of tiresome and often exasperating work to locate individuals in various parts of the building. There has been a great deal of delay and inefficiency in calling people to the telephone or in transmitting messages from the outside or from one part of the hospital to another. At times, these inside calls have interfered with incoming and outgoing hospital calls.

Various types of call systems were studied. We finally discovered a speaker of suitable size and quality which could be adjusted both as to tone and volume. This speaker was installed in thirty locations about the hospital, with a microphone at the telephone desk. It is now possible to get into communication

were not increased, as it was felt that air condition-
ing for patients who require it, is a service which
should be available in hospitals. Our revenue from
Fourth Floor rooms has increased markedly as a result
of special demand for these air conditioned rooms.

Ventilation of chart rooms, diet
kitchens and the Woman's and Men's wards was installed
during the year, with great benefit.

EMPLOYEES' HOSPITAL ASSOCIATION
During the past two years, this
Association has furnished 441 days
of hospital care to 56 of its
employee members. Each patient
has been given a hospital room, and in all but a few
instances, the staff has furnished professional care
without pay. Hospital Endowments and Community Chest
have been relieved of the usual assistance required by
employees, and their Association has paid the hospital
\$2839.35, which represents an actual increase in hospital
revenue, instead of charges to Endowments and Commu-
nity Chest.

At the end of two years, there
was a deficit in the Employees' Fund of \$450.12, which
will probably be made up in the next few months. Em-
ployees now pay 65¢ a month. The deficit could have been
avoided by a payment of 75¢ a month. We feel the increase
will not be necessary.

CALL SYSTEM
For several years our telephone
board has been decidedly over-
worked. Inside calls, i.e.,
calls for doctors and House Staff,
have comprised the largest part of the operator's work,
and have entailed a great deal of tiresome and often
exasperating work to locate individuals in various parts
of the building. There has been a great deal of delay
and inefficiency in calling people to the telephone or
in transmitting messages from the outside or from one
part of the hospital to another. At times, these inside
calls have interfered with incoming and outgoing hospital
calls.

Various types of call systems were
studied. We finally discovered a speaker of suitable
size and quality which could be adjusted both as to tone
and volume. This speaker was installed in thirty loca-
tions about the hospital, with a microphone at the tele-
phone desk. It is now possible to get into communication

with individuals without the use of the telephone board, both for inside and outside calls. As a result of the fact that a call is given in thirty locations at one time, individuals are not missed as they go from one department to another. Very frequently a call is answered before it can be written on the call list. Individuals calling from outside the hospital are frequently connected with very little delay. It is possible that one operator will be able to handle the board with minimum relief by other office employees.

GROUND

With laying out of the Nurses' Home garden, the landscaping of the grounds was completed. Benches for the new garden, designed by Church, are now being made.

We have had an abundance of cut flowers for patients, offices and hallways, which are greatly appreciated.

BUILDINGS

The exterior of the main building and the Clinic building were painted last Fall.

The main hot water supply lines for the entire hospital were replaced with insulated copper pipes.

EQUIPMENT AND REPLACEMENT

The larger expenditures for the year were as follows:

Deep Therapy	-	\$610.57
Grounds, gardens	-	approximately \$1500
Kitchen, ranges	-	\$1099
Linen and cotton	-	\$2466.03
Air conditioning	-	\$1637.94
Physiotherapy equipment	-	\$850
Surgery - fracture tables, orthopedic instruments	-	\$1400

with individuals without the use of the telephone board, both for inside and outside calls. BUILDINGS

The exterior of the main building and the Clinic building were painted last Fall.

The main hot water supply lines for the entire hospital were replaced with insulated copper pipes.

EQUIPMENT AND REPLACEMENT

The larger expenditures for the year were as follows:

Deep Therapy - \$810.57
 Grounds, gardens - approximately \$1500
 Kitchen, ranges - \$1099
 Linen and cotton - \$2456.03
 Air conditioning - \$1657.94
 Physiotherapy equipment - \$650
 Surgery - treatment tables, orthopedic instruments - \$1400

X-ray - stereoscope, shock-proofing, approximately	- \$1300
Furniture for hallways and alcoves	- \$400
Ford adjustable beds for all rooms	- \$1707.50
Electric balancer set	- \$743.90
Stainless steel ware, replacing enamel ware	- \$850

SUMMARY OF
STATISTICS

56,223 patient days care were furnished, this being 7,324 days more than were furnished in 1935, and 16,508 more than were furnished in 1923.

There were 6,976 days of free treatment furnished, this being 860 more than were furnished in 1935.

11,025 X-ray pictures were made; 1045 more than in 1935, and approximately 6,500 more than were taken in 1923.

Laboratory examinations were 26,471, or 2,676 more than last year, and approximately 10,000 more than in 1923.

Collections for the year were \$501,800.47, this being \$77,023.38 more than was collected last year, and approximately double that collected in 1923.

Expenditures were \$76,041.22 more than last year.

Free treatment and discounts amounted to \$71,276.25, or \$10,893.36 more than last year, and \$42,716.20 more than in 1923.

Mr. Deering's Fund (Babcock Fund) furnished \$10,495.27.

Dr. Weeks' Hospitalization Fund furnished \$15,955.12, approximately twice the amount furnished in 1935.

Respectfully submitted,

HOWARD H. JOHNSON, M.D.
Director

No. Assistant Supervisors		4	4	3	3	6
No. Surgical Supervisors	2	2	2	2	2	2
No. General Duty Nurses in Surgery		3	3	3	4	4 $\frac{1}{2}$

The figures above show a considerable increase in illness and hospitalization caused by an epidemic of measles among the students. Only five students actually contracted the disease, but the "contacts" were naturally overwhelming, necessitating hospital isolation and leaves of absence. One of the preliminary students contracted epidemic cerebrospinal meningitis, causing still more of the nurses to be isolated. A swift diagnosis of this case prevented the spread of the disease. The student was sent to the Children's Hospital isolation department, where she made a recovery, but with total loss of her hearing.

The nursing problem has been difficult this year. The hospital has been unusually busy and it has been increasingly difficult to obtain nurses for institutional work, and very often for cases requiring special nurses, especially during holiday and vacation periods. This condition seems general throughout the country. Already articles are appearing in the magazines, advocating larger classes. Graduate nurses are being absorbed in increasing numbers in all forms of Public Health, Industrial and Welfare work. This fact, added to the closing of many schools and the cutting down of school enrollment for the past few years, has resulted in a condition about as serious for hospitals as the over production problem of the depression period was for nurses.

Applications for entrance in the September class have been sufficiently numerous to permit us to select a satisfactory group for the Fall. The class was practically completed by the end of June, with several scheduled for February next. Our educational admittance requirement is still graduation from High School, giving preference to those presenting satisfactory additional educational preparation. The

REPORT OF THE SCHOOL OF NURSING

The forty-seventh Annual Report of the School of Nursing for the year ending June 30, 1935, is respectfully submitted:

1935	1934	1933	1932	1931	1930	1929	1928	1927	1926	1925	1924	1923	1922	1921	1920	1919	1918	1917	1916	1915	1914	1913	1912	1911	1910	1909	1908	1907	1906	1905	1904	1903	1902	1901	1900	1899	1898	1897	1896	1895	1894	1893	1892	1891	1890	1889	1888	1887	1886	1885	1884	1883	1882	1881	1880	1879	1878	1877	1876	1875	1874	1873	1872	1871	1870	1869	1868	1867	1866	1865	1864	1863	1862	1861	1860	1859	1858	1857	1856	1855	1854	1853	1852	1851	1850	1849	1848	1847	1846	1845	1844	1843	1842	1841	1840	1839	1838	1837	1836	1835	1834	1833	1832	1831	1830	1829	1828	1827	1826	1825	1824	1823	1822	1821	1820	1819	1818	1817	1816	1815	1814	1813	1812	1811	1810	1809	1808	1807	1806	1805	1804	1803	1802	1801	1800	1799	1798	1797	1796	1795	1794	1793	1792	1791	1790	1789	1788	1787	1786	1785	1784	1783	1782	1781	1780	1779	1778	1777	1776	1775	1774	1773	1772	1771	1770	1769	1768	1767	1766	1765	1764	1763	1762	1761	1760	1759	1758	1757	1756	1755	1754	1753	1752	1751	1750	1749	1748	1747	1746	1745	1744	1743	1742	1741	1740	1739	1738	1737	1736	1735	1734	1733	1732	1731	1730	1729	1728	1727	1726	1725	1724	1723	1722	1721	1720	1719	1718	1717	1716	1715	1714	1713	1712	1711	1710	1709	1708	1707	1706	1705	1704	1703	1702	1701	1700	1699	1698	1697	1696	1695	1694	1693	1692	1691	1690	1689	1688	1687	1686	1685	1684	1683	1682	1681	1680	1679	1678	1677	1676	1675	1674	1673	1672	1671	1670	1669	1668	1667	1666	1665	1664	1663	1662	1661	1660	1659	1658	1657	1656	1655	1654	1653	1652	1651	1650	1649	1648	1647	1646	1645	1644	1643	1642	1641	1640	1639	1638	1637	1636	1635	1634	1633	1632	1631	1630	1629	1628	1627	1626	1625	1624	1623	1622	1621	1620	1619	1618	1617	1616	1615	1614	1613	1612	1611	1610	1609	1608	1607	1606	1605	1604	1603	1602	1601	1600	1599	1598	1597	1596	1595	1594	1593	1592	1591	1590	1589	1588	1587	1586	1585	1584	1583	1582	1581	1580	1579	1578	1577	1576	1575	1574	1573	1572	1571	1570	1569	1568	1567	1566	1565	1564	1563	1562	1561	1560	1559	1558	1557	1556	1555	1554	1553	1552	1551	1550	1549	1548	1547	1546	1545	1544	1543	1542	1541	1540	1539	1538	1537	1536	1535	1534	1533	1532	1531	1530	1529	1528	1527	1526	1525	1524	1523	1522	1521	1520	1519	1518	1517	1516	1515	1514	1513	1512	1511	1510	1509	1508	1507	1506	1505	1504	1503	1502	1501	1500	1499	1498	1497	1496	1495	1494	1493	1492	1491	1490	1489	1488	1487	1486	1485	1484	1483	1482	1481	1480	1479	1478	1477	1476	1475	1474	1473	1472	1471	1470	1469	1468	1467	1466	1465	1464	1463	1462	1461	1460	1459	1458	1457	1456	1455	1454	1453	1452	1451	1450	1449	1448	1447	1446	1445	1444	1443	1442	1441	1440	1439	1438	1437	1436	1435	1434	1433	1432	1431	1430	1429	1428	1427	1426	1425	1424	1423	1422	1421	1420	1419	1418	1417	1416	1415	1414	1413	1412	1411	1410	1409	1408	1407	1406	1405	1404	1403	1402	1401	1400	1399	1398	1397	1396	1395	1394	1393	1392	1391	1390	1389	1388	1387	1386	1385	1384	1383	1382	1381	1380	1379	1378	1377	1376	1375	1374	1373	1372	1371	1370	1369	1368	1367	1366	1365	1364	1363	1362	1361	1360	1359	1358	1357	1356	1355	1354	1353	1352	1351	1350	1349	1348	1347	1346	1345	1344	1343	1342	1341	1340	1339	1338	1337	1336	1335	1334	1333	1332	1331	1330	1329	1328	1327	1326	1325	1324	1323	1322	1321	1320	1319	1318	1317	1316	1315	1314	1313	1312	1311	1310	1309	1308	1307	1306	1305	1304	1303	1302	1301	1300	1299	1298	1297	1296	1295	1294	1293	1292	1291	1290	1289	1288	1287	1286	1285	1284	1283	1282	1281	1280	1279	1278	1277	1276	1275	1274	1273	1272	1271	1270	1269	1268	1267	1266	1265	1264	1263	1262	1261	1260	1259	1258	1257	1256	1255	1254	1253	1252	1251	1250	1249	1248	1247	1246	1245	1244	1243	1242	1241	1240	1239	1238	1237	1236	1235	1234	1233	1232	1231	1230	1229	1228	1227	1226	1225	1224	1223	1222	1221	1220	1219	1218	1217	1216	1215	1214	1213	1212	1211	1210	1209	1208	1207	1206	1205	1204	1203	1202	1201	1200	1199	1198	1197	1196	1195	1194	1193	1192	1191	1190	1189	1188	1187	1186	1185	1184	1183	1182	1181	1180	1179	1178	1177	1176	1175	1174	1173	1172	1171	1170	1169	1168	1167	1166	1165	1164	1163	1162	1161	1160	1159	1158	1157	1156	1155	1154	1153	1152	1151	1150	1149	1148	1147	1146	1145	1144	1143	1142	1141	1140	1139	1138	1137	1136	1135	1134	1133	1132	1131	1130	1129	1128	1127	1126	1125	1124	1123	1122	1121	1120	1119	1118	1117	1116	1115	1114	1113	1112	1111	1110	1109	1108	1107	1106	1105	1104	1103	1102	1101	1100	1099	1098	1097	1096	1095	1094	1093	1092	1091	1090	1089	1088	1087	1086	1085	1084	1083	1082	1081	1080	1079	1078	1077	1076	1075	1074	1073	1072	1071	1070	1069	1068	1067	1066	1065	1064	1063	1062	1061	1060	1059	1058	1057	1056	1055	1054	1053	1052	1051	1050	1049	1048	1047	1046	1045	1044	1043	1042	1041	1040	1039	1038	1037	1036	1035	1034	1033	1032	1031	1030	1029	1028	1027	1026	1025	1024	1023	1022	1021	1020	1019	1018	1017	1016	1015	1014	1013	1012	1011	1010	1009	1008	1007	1006	1005	1004	1003	1002	1001	1000	999	998	997	996	995	994	993	992	991	990	989	988	987	986	985	984	983	982	981	980	979	978	977	976	975	974	973	972	971	970	969	968	967	966	965	964	963	962	961	960	959	958	957	956	955	954	953	952	951	950	949	948	947	946	945	944	943	942	941	940	939	938	937	936	935	934	933	932	931	930	929	928	927	926	925	924	923	922	921	920 ideal to which we are looking is, of course, two years Junior College in which the pre-nursing course is completed satisfactorily. This would lessen the class room teaching and allow the student more time for bedside instruction. For the present, a good high school record is better than sporadic Junior College work, frequently taken to offset a poor record in High School.

The class admitted in February 1936 was enrolled on the three year basic course program. The preliminary period of these students has been increased from four to six months. Students in this group are available for hospital duty four hours daily, six days a week, for six months. The vacation period has been increased four additional weeks, with a two weeks yearly allowance for sickness. Thus, of the eight months added to the former twenty-eight months course, four months are taken up in additional vacation, time allowance for sickness, lengthened probation, and affiliation for communicable disease experience. The State requires that the remaining four months offer the student experience in services not included in the preceding months. This experience is to be given either in the home school or by affiliation. While these changes are undeniably fine in the preparation of our students, they are going to make the adjustment period difficult and expensive. For example, in sending the students for communicable disease experience, the San Francisco Hospital requires that before entering on the course, they must have completed eighteen months in the home school, including operating room, diet kitchen and some experience in Medical and Surgical nursing. Consequently, in planning for the first group, it will necessitate putting more nurses than usual or necessary, in the Operating Room and Diet Kitchen, reducing again the nurses for bedside care.

With our present enrollment, to give the experience required by the State, it will be necessary to have at least eighteen or twenty students continually engaged in these services, only a part of their time being available for bedside care. Six or eight nurses will be on duty in the Out-Patient Department, six away for communicable disease, and six on duty in the Physiotherapy, Emergency and Supply Room Departments.

The following plan for the required additional services was submitted to and accepted by the State Board of Health:

Out-Patient Department	2 months
Supply Room	1 month
Physiotherapy	2 weeks
Emergency Room	<u>2 weeks</u>
Total	4 months

The six weeks experience required in communicable disease or tuberculosis training will be given at the San Francisco Hospital.

ideal to which we are looking is, of course, two years Junior College in which the pre-nursing course is completed satisfactorily. This would lessen the class room teaching and allow the student more time for bedside instruction. For the present, a good high school record is better than sporadic Junior College work, frequently taken to offset a poor record in High School.

The class admitted in February 1935 was enrolled on the three year basic course program. The preliminary period of these students has been increased from four to six months. Students in this group are available for hospital duty four hours daily, six days a week, for six months. The vacation period has been increased four additional weeks, with a two weeks yearly allowance for sickness. Thus, of the eight months added to the former twenty-eight months course, four months are taken up in additional vacation, time allowance for sickness, lengthened probation, and affiliation for communicable disease experience. The State requires that the remaining four months after the student experience in services not included in the preceding months. This experience is to be given either in the home school or by affiliation. While these changes are undoubtedly fine in the preparation of our students, they are going to make the adjustment period difficult and expensive. For example, in sending the students for communicable disease experience, the San Francisco Hospital requires that before entering on the course, they must have completed eighteen months in the home school, including operating room, diet kitchen and some experience in medical and surgical nursing. Consequently, in planning for the first group, it will necessitate putting more nurses than usual or necessary, in the Operating Room and Diet Kitchen, reducing again the nurses for bedside care.

With our present enrollment, to give the experience required by the State, it will be necessary to have at least eighteen or twenty students continually engaged in these services, only a part of their time being available for bedside care. Six or eight nurses will be on duty in the Out-Patient Department, six away for communicable disease, and six on duty in the Physiotherapy, Emergency and Supply Room Departments.

The following plan for the required additional services was submitted to and accepted by the State Board of Health:

Out-Patient Department	3 months
Supply Room	1 month
Physiotherapy	3 weeks
Emergency Room	3 weeks
Total	4 months

The six weeks experience required in communicable disease or tuberculosis training will be given at the San Francisco Hospital.

Details of these plans are too long for this report, but are on file with us and with the State Department.

With the exception of the class which entered in February of this year, the students in the School, seventy in number, will have to obtain their three year diploma as heretofore, by affiliation with the Schools giving the courses they wish to take. When this new program is well established, many of the present problems will be eliminated or adjusted; expense should decrease and service improve. However, with the many changes taking place in the nursing world, it will continue to be expensive to properly conduct a School of Nursing.

Forty-three students wrote the State Board Examination for Registration during the fiscal year. There were no failures, no grade of "D" - almost 5% "A", 44% "B" and 51% "C". This was better than last year's record in that the general average was higher. The Teaching Staff, though pleased, will not be satisfied until the group is largely "B" or above.

An analysis of the activities of the 41 graduates of June 1935, shows that

- 31 took advanced courses to obtain 3 year diplomas
- 1 was granted her 3 year diploma on her B.A. degree from Stanford, obtained prior to entrance here
- 23 entered Highland School of Nursing, Oakland
- 3 took their course at the San Francisco School of Nursing
- 1 entered Children's Hospital, San Francisco
- 2 entered University of California for the Public Health Course
- 2 entered University of Hawaii for the Public Health Course

and at the end of the fiscal year we find this group located as follows:

- 4 have married and are not nursing
- 21 are still at school, completing their advanced work
- 2 are not nursing
- 4 are still at College completing their Public Health Courses
- 1 returned to College to obtain a teacher's certificate
- 1 has a position in a Doctor's office
- 5 have hospital positions out of town
- 1 has a position at St. Luke's
- 2 are doing special nursing at St. Luke's

The Graduating Exercises were held on June Eleventh. Thirty-seven students received their diplomas and are planning affiliation for their advanced work. One student is entering the University of Hawaii to take the course in Public Health.

Details of these plans are too long for this report, but are on file with us and with the State Department.

With the exception of the class which entered in February of this year, the students in the School, seventy in number, will have to obtain their three year diploma as heretofore, by affiliation with the Schools giving the courses they wish to take. 2 are doing special nursing at St. Luke's

The Graduating Exercises were held on June Eleventh. Thirty-seven students received their diplomas and are planning affiliation for their advanced work. One student is entering the University of Hawaii to take the course in Public Health.

Another is entering Stanford University to obtain a degree.

Chapel service for the School which always precedes the Exercises, was conducted by Mr. Ohlhoff, the Chaplain. The Baccalaureate Sermon was preached by the Reverend Ronald Merrix, Rector of St. Paul's Church, Oakland. The service was broadcast into the garden, so that both patients and guests could enjoy it. We had the honor again of having Bishop Parsons address the graduating class. Mr. Dibblee, President of the Hospital, assisted by Dr. Johnson, the Medical Director, presented the diplomas. Mrs. Thomas Thacher, President of the Women's Board, presented each of the graduates with a copy of the Gospel of St. Luke. At the close of the Exercises, a reception in the Nurses Home was held for the friends and relatives of the graduates. The dance in the evening was enjoyed as always by both the graduates and the School.

Two events in the School year, Christmas Eve and Graduation Day, have come to be very beautiful and impressive services, lending beauty and dignity to the students' memories of their training days. Many of the older graduates attend these services. Christmas carols sung around a lighted tree in the garden, are not soon forgotten by either patients or pupils.

Following is a list of the Class of 1936:

Eunice Boggs	Evelyn Dina Cuneo
Marjorie Bruestle	Margaret Elizabeth Fluetsch
Gayle Carey	Roberta Goldsbrough
Louise C. DeLuchi	Lois Janet Gow
Dolores R. Garcia	Mildred Halvorsen
Dorothy Eleanor Head	Caroline E. Henricks
Elizabeth Hoover	Kathleen Kraul
Audrey Dale Jones	Naomi Eunice Landon
Frederica L. Juhl	Elizabeth Matthews
Evelyn V. Messick	Marjorie Melone
Clarice Moseley	Hazel McCoon
Maxine Mustar	Margery McKee
Margaret Pflock	Lena M. Minoletti
Bernice Renfro	Ruth Elizabeth Moore
Lillian Roy	Carol Plummer
Alexa Lillian Bachar	Mary Quinn
Ruth Baker	Marie Renfer
Emily M. Benedetti	Elneth Belle Stansberry
Mary Helen Capps	

The Staff and Students wish to express their appreciation for all that has been done for them by those interested in their welfare and in the progress of the School.

Respectfully submitted

Grace M. Kennedy, R.N.
Superintendent of Nurses

Another is entering Stanford University to obtain a degree.

Chapel service for the school which always precedes the Exercises, was conducted by Mr. Olinhoff, the Chaplain. The Benedictional sermon was preached by the Reverend Ronald Meritt, Rector of St. Paul's Church, Oakland. The service was broadcast into the garden, so that both patients and guests could enjoy it. We had the honor again of having Bishop Parsons address the graduating class. Mr. Apple, President of the Hospital, assisted by Dr. Johnson, the Medical Director, presented the diplomas. Mrs. Thomas Fisher, President of the Women's Board, presented each of the graduates with a copy of the Gospel of St. Luke. At the close of the Exercises, a reception in the Nurses Home was held for the friends and relatives of the graduates. The dance in the evening was enjoyed as always by both the graduates and the School.

Two events in the School year, Christmas Eve and Graduation Day, have come to be very beautiful and impressive services, lending beauty and dignity to the students' memories of their training days. REPORT OF THE LABORATORY

For the Year Ending June 30, 1936

The attached detailed report again shows an increase in the total number of examinations made of nearly Fifteen Percent above that of the previous year. Again this has been less in the shorter routine procedures than in the more time consuming cases - blood chemistries, for instance, having increased nearly threefold.

An additional full time technician has been employed.

Added laboratory training for Interns and Assistant Residents, and lengthened courses in bacteriology and pathology in the nurses training school, have added to the teaching importance of the Department.

Long used and worn equipment that has been replaced includes two new microscopes, a paraffin oven, a bacteriologic incubator, a hemoglobinometer and many smaller items. Our major problem for the coming year is the better organization of a three year training course for student technicians and its approval by the National Board of Registry. Our minor problems occur daily.

As the year closes, both in material equipment and in the excellence and loyalty of its technicians, the Laboratory is in most splendid shape.

Respectfully submitted,

W. P. Stowe, M.D.

Pathologist

REPORT OF THE X-RAY DEPARTMENT

During the year ending June 30, 1936, the X-ray Department had a total of 3560 radiographic cases. This is an increase of 83 cases over the previous year. There were 11,025 roentgenograms taken and 1192 treatments given. There was an increase of 315 treatments over the previous year.

During the past year all of the radiographic apparatus has been made shock proof. There is probably no other hospital in the country with a first class radiographic department that is completely shock proof. This is a most important step forward and as soon as the public and the insurance companies realize the safety of this type of equipment, it will be illegal to install an X-ray machine that is not shock proof. As St. Luke's was the first to use safety base films to minimize fire hazard, we now lead the way in removing shock hazard.

The major problem of the X-ray department is that of space. There is no waiting room and there are not enough dressing rooms. We have no viewing room and the patients are scattered through the halls while waiting for their pictures to be taken.

We can be justly proud of our equipment, but we are so cramped for space that the department resembles a clinic more than an X-ray department in a private hospital.

Treatments Respectfully submitted,

Charles C. Fulmer, M.D.

Roentgenologist

REPORT OF THE X-RAY DEPARTMENT

During the year ending June 30, 1936, the X-ray Department had a total of 3560 radiographic cases. This is an increase of 85 cases over the previous year. There were 11,085 roentgenograms taken and 1192 treatments given. There was an increase of 315 treatments over the previous year.

During the past year all of the radiographic apparatus has been made shock proof. There is probably no other hospital in the country with a first class radiographic department that is completely shock proof. This is a most important step forward and as soon as the public and the insurance companies realize the safety of this type of equipment, it will be illegal to install an X-ray machine that is not shock proof. REPORT OF THE OUT-PATIENT
AND THE
SOCIAL SERVICE DEPARTMENTS

REPORT OF THE PHYSICAL THERAPY DEPARTMENT

I have the honor of presenting to you the Annual Report of the Out-Patient and Social Service Departments for the year ending June 30, 1936.

This Department of Physical Therapy gave a total of 3198 treatments during the year ending June 30, 1936. During the previous year, 3464 treatments were given, showing a loss of 262 treatments.

During the past year a Radiothermy Machine and a Collins Vasculator have been added to the Department.

Respectfully submitted,

Charles C. Fulmer, M.D.

The Children's Birthday Fund, during the year ending June 30, 1936, received a total of \$353.34. The balance in fund June 30, 1936, amounted to \$339.79. The Edward D. Edwards Fund, which was established for the purpose of purchasing glasses for needy children, received a total of \$300.00. The balance in fund June 30, 1936, amounted to \$289.87.

Mrs. Ida Fleming was added to our Personnel in May. Mrs. Fleming is a Graduate Nurse from Children's Hospital, San Francisco, where, for the past thirteen years she has been employed as Assistant Director of Social Service. The increase in clerical work has made it necessary to employ at full-time the services of Mrs. Helen Meyer, who, for the past two years, has had charge of our Admittance Room and stenographic work.

The usual Christmas Tree Shoe Party was given this year. Two hundred children were made happy with shoes, toys, candy and ice cream. Mr. A. Thussen, with three shoe salesmen to assist him, officiated for the third consecutive year as Santa Claus, through the courtesy of Buckingham & Knight. The candy was donated by Mr. Walter Hues; the shoes were purchased with money obtained through individual donations, \$200.00 of which was received from Mrs. Alexander Hamilton.

REPORT OF THE PHYSICAL THERAPY DEPARTMENT

This Department of Physical Therapy gave a total of 3198 treatments during the year ending June 30, 1936. During the previous year, 3464 treatments were given, showing a loss of 266 treatments.

During the past year a Radiotherapy Machine and a Collins Vasculator have been added to the Department.

Respectfully submitted,

Charles C. Palmer, M.D.

REPORT OF THE OUT-PATIENT
AND THE
SOCIAL SERVICE DEPARTMENTS

I have the honor of presenting to you the Annual Report of the Out-Patient and Social Service Departments for the year ending June 30, 1936.

During the past year 17,099 visits were made to the Out-Patient Department. Of these, 1,259 were made by new patients; 2,539 home visits were made by the Visiting Nurse; 3,364 visits were made to the Out-Patient Department by patients authorized and paid for by the State and County Relief Associations, at the rate of 65¢ per visit, for which St. Luke's was paid \$2,186.00.

In January, an Allergy Clinic was added, with Dr. M. Stallings as Chief - Clinic days, Wednesday and Saturday morning of each week. Twenty-eight patients have made one hundred and fifty-five visits to date. This Clinic is adding very materially to the efficiency of the Out-Patient Department, for, previous to January, we were referring all our Allergy patients to the University of California Hospital, which was a very unsatisfactory arrangement.

The Children's Birthday Fund provided special nursing care for nine children, at the cost of \$361.10. Donations received this year totaled \$533.64; balance in fund June 30, amounted to \$269.79. The Edward F. Glaser Fund provided thirty-four patients with glasses, at a cost of \$202.76. Donations to this Fund amounted to \$140.65. \$67.81 was paid back by grateful patients who had been furnished glasses, and were later financially able to reimburse the Fund. Balance in Fund June 30, \$229.87.

Mrs. Ida Fleming was added to our Personnel in May. Mrs. Fleming is a Graduate Nurse from Children's Hospital, San Francisco, where, for the past thirteen years she has been employed as Assistant Director of Social Service. The increase in clerical work has made it necessary to employ at full-time the services of Mrs. Helen Meyer, who, for the past two years, has had charge of our Admittance Room and stenographic work.

The usual Christmas Tree Shoe Party was given this year. Two hundred children were made happy with shoes, toys, candy and ice cream. Mr. A. Thusen, with three shoe salesmen to assist him, officiated for the third consecutive year as Santa Claus, through the courtesy of Buckingham & Hecht. The candy was donated by Mr. Walter Haas; the shoes were purchased with money obtained through individual donations, \$200.00 of which was received from Mrs. Alexander Hamilton.

REPORT OF THE OUT-PATIENT AND THE SOCIAL SERVICE DEPARTMENTS

I have the honor of presenting to you the Annual
Report of the Out-Patient and Social Service Departments
for the year ending June 30, 1936.

During the past year 17,092 visits were made to the
Out-Patient Department. Of these, 1,329 were made by new
patients; 2,589 home visits were made by the Visiting Nurses;
3,364 visits were made to the Out-Patient Department by
patients authorized and paid for by the State and County
Relief Associations, at the rate of 65¢ per visit, for which
St. Luke's was paid \$2,186.00.

In January, an Allergy Clinic was added, with Dr.
M. Stallings as Chief - Clinic days, Wednesday and Saturday
morning of each week. Twenty-eight patients have made one
hundred and fifty-five visits to date. This Clinic is adding
very materially to the efficiency of the Out-Patient Depart-
ment, for, previous to January, we were referring all our
Allergy patients to the University of California Hospital,
which was a very unsatisfactory arrangement.

The Children's Birthday Fund provided special nursing
care for nine children, at the cost of \$381.10. Donations
received this year totaled \$333.64; balance in fund June 30,
amounted to \$289.79. The Edward F. Glasser Fund provided
thirty-four patients with glasses, at a cost of \$308.76.
Donations to this fund amounted to \$140.65. \$67.81 was paid
back by grateful patients who had been furnished glasses, and
were later financially able to reimburse the fund. Balance
in fund June 30, \$329.87.

Mrs. Ida Fleming was added to our Personnel in May.
Mrs. Fleming is a Graduate Nurse from Children's Hospital,
San Francisco, where, for the past thirteen years she has been
employed as Assistant Director of Social Service. The increase
in clerical work has made it necessary to employ at full-time
the services of Mrs. Helen Meyer, who, for the past two years,
has had charge of our Admittance Room and stenographic work.

The usual Christmas Tree Shoe Party was given this
year. Two hundred children were made happy with shoes, toys,
candy and ice cream. Mr. A. Thuesen, with three shoe sales-
men to assist him, organized for the third consecutive year
as Santa Claus, through the courtesy of Buckingham & Heath.
The candy was donated by Mr. Walter Haas; the shoes were
purchased with money obtained through individual donations,
\$200.00 of which was received from Mrs. Alexander Hamilton.

We wish to thank the members of the Medical and Surgical Staff, for their co-operation and helpful guidance during the past year. The statistical report shows the volume of work done.

Respectfully submitted,

ALICE O'DEA, R.N., S.W.
Director of Social Service

REPORT OF THE CHAPLAIN

The following page covers activities and report of the Chaplain for the Fiscal Year July first, Nineteen Thirty-five to June thirtieth, Nineteen Thirty-six. Other than the routine visits as requested there were held a total of seventy-eight services in the Chapel, viz: Evening Prayer said forty-eight times; Holy Communion celebrated seventeen times; six Baptisms; seven other services, including Graduation.

The Reverend Donald Merrix of St. Paul's, Oakland, gave the Baccalaureate Sermon, the theme and the development of which haply fitted as an introduction to the Bishop's Address on Christian Character.

The Christmas Eve Service together with the Capping of the Probationers, followed by the caroling through the Hospital and in the Dibblee Court, were especially lovely and particularly commented on. This was undoubtedly due to the improvement in the singing brought about by special instruction from Val Ritschey.

In October of Nineteen Thirty-five, Dr. Johnson consulted with the Chaplain concerning the use of the Chapel by the Medical Staff. The Resident Physician had made a careful survey of the Hospital facilities for the weekly discussions of cases. No place in the Hospital was so desirable or adequate in size, arrangement and location, as the Chapel. In the absence of the Bishop, the Chaplain gave a conditional and qualified consent. Inasmuch as our physicians are gentlemen and therefore would have an instinctive and proper reverence for the Chapel and inasmuch as the purpose was purely professional--which in the practice of medicine is basically humanitarian, there seemed no reasons against such use of the Chapel. The meetings were opened with short form of prayers reverently participated in by the doctors. On his return, the Bishop approved of this procedure.

The clergy of the Diocese have used the facilities of the Chapel and they also have notified the Chaplain of Churchmen and women who were patients or nurses, who came to St. Luke's.

Respectfully submitted,

Henry Ohlhoff
Chaplain

REPORT OF THE CHAPLAIN

The following page covers activities and report of the Chaplain for the Fiscal Year July First, Nineteen Thirty-five to June thirtieth, Nineteen Thirty-six. Other than the routine visits as requested there were held a total of seventy-eight services in the Chapel, viz: Evening Prayer said forty-eight times; Holy Communion celebrated seventeen times; six Baptisms; seven other services, including Graduation.

The Reverend Donald Merritt of St. Paul's, Oakland, gave the Ascension Sermon, the theme and the development of which happily fitted as an introduction to the Bishop's Address on Christian Character.

The Christmas Eve service together with the singing of the Probationers, followed by the caroling through the Hospital and in the Bible Court, were especially lovely and particularly commented on. This was undoubtedly due to the improvement in the singing brought about by special instruction from Val Hickey.

In October of Nineteen Thirty-five, Dr. Johnson consulted with the Chaplain concerning the use of the Chapel by the Medical Staff. The Resident Physician had made a careful survey of the Hospital facilities for the weekly discussions of cases. No place in the Hospital was so desirable or adequate in size, arrangement and location, as the Chapel. In the absence of the Bishop, the Chaplain gave a conditional and qualified consent. Inasmuch as our physicians are gentlemen and therefore would have an instinctive and proper reverence for the Chapel and inasmuch as the purpose was purely professional--which in the practice of medicine is basically humanitarian, there seemed no reasons against such use of the Chapel. The meetings were opened with short form of prayers reverently participated in by the doctors. On his return, the Bishop approved of this procedure.

The clergy of the Diocese have used the facilities of the Chapel and they also have notified the Chaplain of Churchmen and women who were patients or nurses, who came to St. Luke's.

Respectfully submitted,

Henry Chihoff

The most important work of the year is the Birthday Club, which gives a birthday gift to each of the members, the home nurses, the hospital workers and the children. Already the funds have been raised for the club, and we feel that the club will continue to be of value to the hospital.

This year the Board has had a very good member, with the resignation of Mrs. [name] But we have welcomed two new members, Mrs. [name] sister of Mrs. [name], and Mrs. [name].

The Board would like to express its appreciation to the whole staff for their kind and helpful cooperation in our attempts to do our best for the hospital.

Respectfully,
[Signature]

John W. [Name]

ANNUAL REPORT OF THE WOMAN'S BOARD - 1935-1936

During 1935 the Woman's Board of St. Luke's Hospital has met on the second Friday of each month, except during the summer months of June, July and August. The hospital has been visited regularly by the members who have returned their suggestions for change or improvement to the Board at each meeting.

The Board has been able to assist in many of improvements accomplished in the hospital during the year. A decorating committee, as aid to Dr. Johnson, helped to select a general standardized color scheme and place of arrangement for the private rooms, and to choose new furniture and draperies for the waiting alcoves in the halls.

The most important work of the year is the Birthday Club, which grows steadily under the guidance of the committee, the Board members, and its many interested subscribers both in and out of the hospital. Already the funds have been used in several desperate cases, and we feel that the Birthday Club is now, and will continue to be of unlimited value and service.

This year the Board has lost a most valued and beloved member, with the resignation of Mrs. McKinnon. But we have welcomed two new members - Mrs. Harry Brown, sister of Mrs. McKinnon, and Mrs. Alexander Donald.

The Board wishes to express its thanks to the whole Staff for their kindness and cooperation with us in our attempts to be of service to the hospital.

Respectfully submitted,

Helen P. Dallas
